Select existing VM *

Select

Description (Optional)

This is an example of legal text. The base size is 12px and the base color is #454b52 but is not the only color. If needed adjust the color to make sure sure this text meets a contrast ratio of 4.5:1 with the background color or image.

You can add emphasis to legal text using the medium weight font. You can also place underlined links within the text. In the CSS this is 'type-legal'.

Due to sketch limitations, you will need to detach this symbol in order to fromat the text for your needs.

CREATE NEW FOLDER

ADD NEW FILE

The image displays a 3x3 grid of virtual machine (VM) control cards. Each card represents a VM with a specific name and configuration. The cards are arranged in three rows and three columns. The first row shows a 'SampelVM' card in a 'Stopped' state, a 'Lorem ipsum dolor sit amet' card in an 'ON' state, and another 'Lorem ipsum dolor sit amet' card in a 'Stopped' state. The second row shows the 'SampelVM' card in an 'ON' state, the 'Lorem ipsum dolor sit amet' card in a 'Stopped' state, and another 'Lorem ipsum dolor sit amet' card in a 'Stopped' state. The third row shows the 'SampelVM' card in a 'Stopped' state, the 'Lorem ipsum dolor sit amet' card in a 'Stopped' state, and another 'Lorem ipsum dolor sit amet' card in a 'Stopped' state. Each card features a power button icon, a status indicator (either a green 'ON' pill or a grey 'Stopped' pill), and a 'Connect' button. The background of each card is a dark grey, and the text is white. The VM configuration details are listed below the status indicator: Type: Lorem, Autostart: true, Virtual CPUs: 2, Memory: 2048, BootLoader: UEFI, Com Port: /dev/nmdm9B, and Description: . The cards are arranged in a grid that is 3 rows high and 3 columns wide. The first row shows a 'SampelVM' card in a 'Stopped' state, a 'Lorem ipsum dolor sit amet' card in an 'ON' state, and another 'Lorem ipsum dolor sit amet' card in a 'Stopped' state. The second row shows the 'SampelVM' card in an 'ON' state, the 'Lorem ipsum dolor sit amet' card in a 'Stopped' state, and another 'Lorem ipsum dolor sit amet' card in a 'Stopped' state. Virtual Machines Documentation

Learn create, deploy, and manage

Welcome!

To start building your Own VM, select the type of service(s)

1. Get a license Key

2. Enter a license Key

CloudShare's Upload Files feature enables you to easily upload files to a virtual machine in your environment. With this feature, you can conveniently complete tasks by uploading files (including batch, integration, data and other types) and then use them during your training exercise or POC demo.

With the Upload Files feature, you can also upload configuration or executable files to work more efficiently with the files you need in the virtual machine.

Note
Files need to be uploaded per machine, per class.

Select services for VM

☒ File Upload

☐ Open a virtual Machine

☐ Connect to a Remote Server

☐ Connectto VMware vCloud Air

< Back

Next

Uploading Files to Your Class Environment

1

Within your environment, select the relevant VM, and then select File Upload from the menu.

2

To upload a file, click **Upload Files**. You can also drag and drop files into the specified area. While no limitations on the number of files or file types you can upload, there are some file size and naming restrictions.

3

Browse to and find the files you want to upload on your local machine.

4

Click Where are my files? to see where your files are saved. Your files will be placed in a folder called Uploads, which is determined by your machine's operating system. For Windows, this is located in C:\Uploads; and for Linux, the location is the admin home folder, sorted alphabetically (we will choose the first admin user to run).

5

During the upload process, you will either see that your file is still being uploaded (with a blue circle notification); that there is an error (with a red circle notification); or that the file was uploaded successfully (green circle notification).
