SUPPORT:

Influxis:

Influxis offers expert hands-on support through multiple different channels (email, phone, and live chat). Influxis also offers **weekend support** and **24 / 7 emergency** support. This is **free** to all of our customers who use our hosting service. Support includes code review, load balancing, optimizations, etc. We also support select third party software such as **FFMPEG** and **node.JS**.

Amazon:

Amazon offers you support, but you must purchase a package that is minimum \$100.00 or 10% (scaling down) of your EC2 costs. This also means your support cost goes up with your EC2 usage and isn't directly related to the amount of support you use. You can also purchase Developer Support for \$50.00, but you will not have direct routing to senior support engineers and they do not support third party software.
